## DEVOTED HEALTH CORE (HMO)

# Know the Stages

The amount you'll pay for prescription drugs depends on the stage of coverage you're in. Here's how the stages work.

---

### **Stage 1 Deductible Stage**

This stage does not apply to Devoted Health Core (HMO) for 2022. Go to Stage 2 right away.

---

### **Stage 2 Initial Coverage Stage**

You stay in this stage until your total drug costs in 2022 reach **\$4,430**. This includes amounts paid by you, your plan, Extra Help, and others.

---

### **Stage 3 Coverage Gap Stage (Donut Hole)**

You stay in this stage until your total out-of-pocket drug costs in 2022 reach **\$7,050**. This includes amounts paid by you, Extra Help, and others (but not your plan).

---

### **Stage 4 Catastrophic Stage**

Once you reach this stage, you pay the costs listed for the rest of 2022.

# Know Your Costs

The premiums listed are for both medical services and prescription drug benefits. The premiums listed do not include any Part B premiums you may have to pay.

The prices listed in this chart are the most you'll pay for prescription drugs. In some cases, you may pay less.

In certain stages, you may see a percent (like 15%) instead of a flat dollar amount. This means the cost of your drugs in that stage will vary based on the drug's price. You pay 15 cents for every dollar that the drug costs. So a \$1 drug would cost you \$0.15. A \$10 drug would cost \$1.50.
