

Understanding our Stars Rating goals

How we set our Stars goals

We're committed to earning a 5-Star Rating for our Medicare Advantage plans' clinical goals each year. To create these goals, we evaluate potential changes to 5-Star Rating cut points, look at previous performance metrics, and see how other Medicare Advantage plans are doing. Then, we outline 3 ranges:

- **On-target:** this is our best chance at performing within the 5-Star threshold
- **Must-hit goal:** it's still possible to hit the 5-Star threshold by the end of the year, but will require attention
- **Below must-hit goal:** this means we're at risk of not hitting the 5-Star threshold unless we change course

Help us meet performance goals

Here's how your office can help us stay on track to earn a 5-Star Rating:

- Reach out to our members to close gaps in care
- Prioritize measures that may be under-performing
- Check for gaps in patient data, chart submissions, missed opportunities, and targeted patient lists for care opportunities
